### 1. Call to Order 7 pm Eastern

a. Welcome/Introductions

### 2. Discussion/Summary:

Michelle Clark and Chris from Bloomington Meadows Hospital came to speak. Michelle is the representative that covers EDs in this area. This mental health hospital receives multiple calls regarding behavioral health needs from Regional and Union Hospitals. They are offering outpatient beds and this is the only facility in this area to do this. They have presence in 60 schools in Indiana. They are performing telehealth assessments in EDs, schools, and outpatient clinics. They offer patient and family-centered care. They hope to perform a mental health assessment as part of a direct referral within 30 minutes. They employ many types of health care workers. They are able to house 74 patients and they are flexible as far as the types of patients who are admitted. Michelle stated that it is totally fine to call her if a health care worker feels that the direct referral process needs to be completed more quickly. She discussed something on Instagram called a “50 day challenge.” This is very dangerous. Children are provided with a task to do each day, such as cutting their skin, or hurting themselves in some manner. At the end of the 50 day challenge, the child is given a task that may be fatal. They spoke about a 2-day conference taking place in Brown County with 8 hours of continuing education credits available, cost \$40. Lunch and learn will take place in Terre Haute in August, 2017. Also, CEs are available for lunch and learn. Linda Palmer asked questions regarding transferring patients and the best way to assist with transferring patients to avoid “stepping on toes” of those involved in transferring patients. Michelle stated to call her directly when the process seems slow.
